Investment Options and Portfolio Strategies

You have the option to choose from two portfolio strategies:

Self-Managed Portfolio Strategy:

Under this portfolio strategy, you have the option to allocate your premium in any of the 9 segregated funds and tailor your investment approach to meet your financial objectives. The asset allocation under each segregated fund is provided in the table below. You can choose one or more funds and in any proportion within the Self-managed Portfolio Strategy.

Lifestyle Portfolio Strategy:

We understand that your investment need and objectives are dynamic and change as per your changing life stage. The Lifestyle Portfolio Strategy addresses the same by providing you with the right mix between Equity and Debt, based on the duration of your investment. This helps you automatically decrease your exposure to Equity and increase your exposure to Debt as your age increases and your policy nears

maturity.

Under this strategy, depending on the duration of your policy, premium paid net of premium allocation charges (if any) will be allocated between the 3 investment funds as per a pre-defined strategy
